

OUR AESTHETIC SERVICES

Permanent Hair Reduction: Diode laser technology effectively eliminates unwanted hair for both men and women of all skin types. The procedure is fast, safe, and virtually pain free.

Body Contouring: **Accent™** is a new body shaping treatment that reshapes bulges or sagging skin. It helps flatten your stomach, slim your hips and thighs, and tone your upper arms. Another option is **Near Infrared Skin Tightening** which uses a safe infrared light that heats the tissue under the skin's surface, tightening skin laxity and improving skin architecture. Both of these treatments can also be used on the face and neck to tighten and smooth the skin.

Skin Tightening: **Pellevé Wrinkle Reduction System** can refresh your appearance without surgery, treating facial wrinkles safely and effectively with radiofrequency energy. There is virtually no pain and no downtime. **Accent Treatments** and **Near Infrared Skin Tightening** (described above) are also excellent skin tightening treatments for the face.

Skin Rejuvenation: State-of-the-art treatments are performed on face, neck, hands, or body. Customized treatments may include **AFT Photo Rejuvenation, AFT with Allumera Treatments, Pixel Laser Skin Resurfacing, and Pixel Q-Switch Laser Treatments.** These treatments may be used to erase age spots, sun damage, and redness due to broken capillaries, stimulate collagen and improve texture and tone for fine lines and wrinkles. We offer these and other modalities in many different combination packages for overall benefit and rejuvenation.

Botox: This FDA-approved, non-surgical wrinkle relief treatment smoothes frown or expression lines on the forehead and around the eyes. Another popular use for **Botox®** is the prevention of hyperhidrosis - sweating under the arms.

Wrinkle Fillers: Combining artistry with superior medical technique, the injection of our long-lasting volumizing wrinkle fillers, such as **Radiesse®**, **Restylane®**, and **Juvederm®**, will achieve immediate and remarkable results. **Liquid Facelift**, an advanced injectable filler technique can be performed with impressive rejuvenation. Advanced scheduling needed for procedure.

Chemical Peels: We offer light to medium depth peels that will regenerate the skin for a healthy glow. We also offer our **Advanced Pigment Peel** to improve uneven skin tone, deep pigment issues, or melasma.

Customized Facials: Each facial is specifically designed by our medical esthetician to meet your skin care needs. Customized Facials may include: **DermaSound™ Elite**, an ultrasonic skin treatment system that can improve all skin conditions through combined deep cleansing, enhanced product absorption, and soothing micro-current application; and **HydraFacial™**, an advanced, non-laser skin resurfacing treatment that removes dead skin cells and impurities while simultaneously bathing the new skin with cleansing, hydrating, and moisturizing skin solutions leaving skin healthy and radiant.

Dermaplaning: This safe, mechanical exfoliation treatment leads to fresher, softer skin. Repeated treatments can help reduce the appearance of age spots, fine lines, and scars.

Acne Treatments: Some acne treatments may include: **Photodynamic Therapy:** activated with IPL, and is extremely effective in reducing moderate acne due to hormonal imbalances, overactive sebaceous glands, and/or bacteria in both teens and adults and **Actinage Acne Peel:** a superficial peel that combines Salicylic, Mandelic and Azelaic acids with Retinol for the treatment of oily and blemish prone skin.

Tattoo Removal: Q-switched lasers now provide a safe and effective way of removing tattoos.

Medical Grade Skin Care Products: All of our skin care programs are used in conjunction with our in-clinic treatments to achieve optimal results and maintain healthy, normal skin. We also offer **Latisse™**, an FDA approved prescription treatment used to grow eyelashes, making them longer, thicker, and darker; and **Clarisonic®**, an at-home professional sonic cleansing system that is proven to remove more makeup, dirt and oil than manual cleansing. Specialty skin recovery kits which include **Oxygenetix Makeup** are also available after our more intense skin treatments.
