

MEDICAL INSURANCE REQUIREMENTS

When you schedule an appointment at WVCMS, you will be asked for specific insurance information and a credit card number. Please have your insurance card available during this time. Under Federal Law, all healthcare providers are required to verify patient identity with either a government issued photo I.D. or two forms of identification. Bring your insurance card and I.D. with you the day of your appointment.

We encourage you to familiarize yourself with the specific requirements of your insurance plan in regards to plan participation, patient responsibility, and prior authorization requirements. Each carrier has specific rules regarding coverage and benefits. It is your responsibility to understand them. If you have any benefit or coverage questions, please contact your insurance company directly. Many insurance plans have limitations to coverage and benefits, which can result in a balance for which you may be responsible.

WVCMS providers participate in most major insurance plans. Check with your insurance company to see if WVCMS is a participating provider.
